

Tekta. Your new clear sheet.

We traveled the world looking for the perfect clear sheet, compatible with our line of kiln-glass and found the only way to get it right was to make it ourselves. Available at select Bullseye distributors now.

Bullseye's Tekta glass is the ultimate clear sheet glass for kilnforming. This new glass is clean, uniform, flat, affordable and available in a broad range of sizes (up to 40" x 80") and thicknesses (3mm, 4mm and 6mm). Each sheet has four trimmed edges, and is an ideal base or cap glass for art or architecture. Make Tekta your new clear base glass. Tekta is manufactured on a new production line at the Bullseye Glass Co. factory in Portland Oregon, where the production is carefully monitored to insure that the glass is formed, tested and packaged to the highest possible standards.
