GRADE CODES

Glass is assigned one of six grades at the factory:

F: Often called “Fusible,” a glass that has passed factory testing for color and compatibility in kilnwork. Also called “Tested Compatible” or “Bullseye Compatible.” Recommended for kilnwork, flamework, stained glass or mosaic.

P: First-quality non-fusible glasses are called “Standard Production.” Not recommended for kilnwork but good for stained glass or mosaic use.

B: Fusible-curious glasses. Compatible, but fired color or appearance falls outside of target range. Sometimes called “Furious.” Discounted. Recommended for kilnwork, flamework, stained glass or mosaic.

C: Non-fusible, nonstandard glasses are graded and marked “Curious.” These may not fall within the accepted color range or may have minor flaws. Discounted. Not recommended for kilnwork, but good for stained glass or mosaic use.

F Rod: Recommended for both kilnwork and torchwork.

T Rod: Recommended for torchwork only.
