

Quick Tip: Opaline Overlays

Above: White (000113-0030), Driftwood Gray (000132-0030), Elephant Gray (000206-0030), Deco Gray (000136-0030), Slate Gray (000236-0030), Black (000100-0030)

Opaline sheet glass. Amazing on its own—also a great tool to expand your color palette in kilnforming, creating new colors with distinct properties.

As an overlay, expect subtle changes when fired over light value styles and more dramatic effects over dark values.

The small tiles are uncapped, fired on a clear base. The large tiles are capped with Opaline (000403-0030). All shown in reflected light, unless noted.

Medium Value Transparent: Medium Amber (001137-0030), Light Sky Blue (001414-0030), Light Plum (001405-0030).

Medium Value Opalescent: Spring Green (000126-0030), Sunflower Yellow (000220-0030), Tangerine Orange (000025-0030).

Dark Value Transparent: Red (001122-0030), Olive Green (001141-0030), Deep Royal Blue (001114-0030).

At left and above: These photos show the same tiles. The image above is shown in transmitted light. The base color shows through.
