Amanda Simmons

In 2021, artist Amanda Simmons took some time to review her body of work since 2010. As she reflected, she began to recognize a theme shared by many of her pieces. What was the theme exactly? It was an electric tension, a creative drama. It was a quality she had long felt in both the process of making and in her experience of what she made. It had to do with nature and a sense of place. Until that time, Simmons hadn't put the feeling more expressly. There hadn't been a need to. But now that she'd stopped to mull, her muse began making itself known.

For over a decade, Simmons' work had been especially inspired by birds and flowers. Her intuitive experience of them had always been more than enough to energize her thriving studio practice. That fact hadn't changed. What had changed, however, was Simmons' formulation of a fresh

conceptual acuity about what her work so often explored. Her draw to birds and flowers, she realized, could be articulated as a fascination with their blend of toughness and vulnerability. In their unique and winsome ways, they embodied the push, pull, and seemingly paradoxical interdependence of fragility and strength.

Sparked by this revelation, Simmons returned to her studio and developed the three distinct techniques that would

become the core content of her popular live online class, *Delicate Disco*. (Two of those three techniques made the vessels featured on Catalog 14's cover.) Each of these techniques manages to feel both fresh and exciting, while still recognizably the work of Amanda Simmons. They're a beautiful reminder to keep reflecting, experimenting, and exploring. You never know when a new material, concept, tool, or insight will expand your practice in exciting ways.

● This style may not reveal (or strike to) its target color until fired. For more information, see page 66.

▼ Hues of shift colors change depending on thickness and/or lighting, regardless of whether they have been fired or not.

Each glass style has specific performance characteristics. Read working notes in the About Our Glass section of bullseyeglass.com before starting any project.

With ninety cumulative years at Bullseye, Dan and I have plenty to reflect upon. And we do. Often. Probably to the annoyance of our younger co-workers.

The image on this catalog’s cover certainly ignited another gabfest. We are both great fans of Amanda Simmons’ works. Their feathery, fragile-yet-enduring shapes recall for us a conversation Amanda and I had many years ago on the theories of French philosopher Gaston Bachelard, who suggests that a nest is formed by the very body of the bird that builds it, that our interior spaces form our exterior ones.

Bullseye’s exterior remains today what its “soul” formed almost 50 years ago: the passion to handcraft a material for artists, to grow not so much in size, but in quality, and, especially, in connection with its community of users.

We are both proud that Bullseye’s spirit today remains what it was when founded. Its “nest” reflects the beings that built it and continue to determine its essence. The people-centric core of the Bullseye factory has and will, we hope, forever shape the nature of the business we lead.

We owe decades of gratitude to our team, and to the makers who work with the glass that team forms—by hand—in our Portland factory.

Amanda’s cluster of diaphanous nest-like vessels on this year’s catalog perfectly reflects all that Dan and I believe Bullseye is, and we hope will continue to be for years to come.

Lani McGregor, *Director, Bullseye Projects*
 Daniel Schwoerer, *CEO, Bullseye Glass Co.*

On the Cover: Amanda Simmons, *Particle Vessel Collection*, 2023. Clear sheet glass and powders using two of the techniques on the Delicate Disco course (all-in-one and layered). Medium vessels ≈13 cm diameter × 9–11 cm high. Small vessels ≈7 cm diameter × 5–7 cm high. Extra small vessels ≈5 cm diameter × 5–6 cm high. Photography: Euan Adamson.

At Left: Amanda Simmons, *Northern Hemispheres I*, 2023. Kilnformed glass, 17.57” diameter × 4” (45 cm × 10 cm).

Photography: Euan Adamson.

Opalescent

Light-reflecting glass styles, equally excellent for kilnwork, stained glass, and mosaic applications.

The dimensions above are approximate.

Opalescent sheet glass is available in double-rolled **3 mm (-0030)** and **Thin, 2 mm (-0050)**.

Due to the handcrafted nature of Bullseye glass, all colored sheets have at least one rolled edge.

Approximate color before firing

Color after a full fuse firing. A solid sample indicates no change from unfired to fired. Each sample is 8" (20 cm) wide.

TE RONGO KIRKWOOD

I aim to reveal underlying celestial narratives and achieve a collapsing of space and time as possible through a Māori world view. I embed within each woven strand of flax or patterned piece of glass not only my own stories, but also stories of those who came before me and those that follow. This work is inspired by whakapapa (existential links between all things) and wairua (life force) stories where the relationship of past/present/ future is entangled in threads and glimpsed in the transparency of glass.

—Te Rongo Kirkwood

Te Rongo Kirkwood combines fused glass, textiles, and other media to create objects that blur the lines between sculpture, craft, and personal adornment. She draws upon both her Māori and Pākehā (European) heritage and knowledge systems to inform her conceptual and visual frameworks. Her work is a reflection of a universal perspective, rooted in archetypal and esoteric symbolism, while also firmly grounded in the rich cultural tapestry of the Maori worldview.

At Right: Te Rongo Kirkwood

White

White
000113-0030, -0050, -0000
For kilnforming and stained glass. More opaque after firing, but still transmits light.

Opaque White
000013-0030, -0050
Our brightest white. Completely opaque before and after firing.

Dense White
000313-0030, -0050
A neutral white well-known for its strong reactive potential.

Translucent White
000243-0030, -0050 ●
Fires to an even white, but more translucent than White (000113). Cold sheet may have irregular white markings.

Lacy White
000143-0030, -0050 ●
Intended for stained glass: when fired, strikes to an even white with unpredictable density.

Warm White
000920-0030, -0050
It's still white, just warmer!

Cream
000420-0030, -0050
Like French Vanilla but without the reactivity.

French Vanilla
000137-0030, -0050, -0000
Warm with amber tones. Reacts with silver. May strike to a bright dense white. Expect variation.

Opaline
000403-0030, -0050 ●
Strikes to a milky white that transmits softened yet fiery light. Can have a dramatic effect as an overlay.

Reactive Cloud
000009-0030, -0050
Slightly bluer and more translucent than White (000113) when fired. See reaction tips on page 51.

Transparent

Bullseye's transparent styles transmit light. Stack and combine for custom colors and light modulations.

Approximate color before firing. Color after a full fuse firing. A solid sample indicates no change from unfired to fired. Each sample is 8" (20 cm) wide.

Rainbow Iridescent

Iridescent sheets with our signature matte surface and textured styles. Most are available in both 3 mm and Thin 2 mm thicknesses. The iridescent surfaces are food safe and permanent at full fuse temperatures.

Dimensions are approximate. Due to the handcrafted nature of Bullseye glass, all colored sheets have at least one rolled edge.

Iridescent coatings may vary in appearance from edge to edge and from sheet to sheet. For example, the rainbow iridescent coating on a black sheet may appear on approximately two-thirds of the surface, while the remaining area shows only silver or gold iridescent hues.

Note: Never fire irid-side-down on ThinFire, as pitting may occur. Instead, always fire irid-side-down on a primed shelf.

Approximate color before firing

Color after a full fuse firing. A solid sample indicates no change from unfired to fired. Each sample is 8" (20 cm) wide.

Above: Full sheet of gold iridescent on black (000100-0038) is approximately 20" x 35" (50.8 x 88.9 cm). Note: There may be color variations in the iridescent coating across the sheet.

Clear

Clear & Crystal Clear Tekta

Flat, uniform, and available in a range of sizes.
Trimmed on all sides so there's no waste.
Lead-free and Bullseye Compatible.

Which Tekta?

For a water-white appearance on the edge, go with Tekta Crystal Clear (1401). Tekta Clear (1100) will have a slight green tint on the edge.

Alchemy Clear & Alchemy Clear Iridescent

Alchemy Clear Silver to Gold
001015-0030, -0050

Upon firing, silver foil turns gold. Has a slight blue tint in cold and fired form. **Note:** Silver to Gold is softer and slumps at a faster rate.

Alchemy Clear Silver to Bronze
001016-0030, -0050

Upon firing, silver foil turns a rich reddish bronze. Has a slight coral tint in cold and fired form.

Alchemy Clear Iridescent, Silver to Gold
001015-0031, -0051

Alchemy Clear Iridescent, Silver to Bronze
001016-0031, -0051

Above: Linda Gass, *Restoration Alchemy* 2018. Fused artwork, 10" x 10" x 3/4" (25.4 x 25.4 x 0.6 cm). (Photo courtesy of Keay Edwards.) Gass explores how landscapes change over time focusing on those places where destruction and renewal, wounding and healing, absence and presence overlap. lindagass.com

While yonsei tattooing is Stoll's primary focus, he is also interested in public art, murals, cultural preservation, and community development. Learn more at yokenji.net and tietonmosaic.com

Stained Glass & Mosaic

All of our sheet glass styles, fusible and non-fusible, work wonderfully for stained glass.

In the same way kilnforming methods continue to expand and evolve what can be done with Bullseye glass, makers in the stained glass and mosaic traditions are finding fresh ways to put our materials to work. Some are learning that kilns can serve stained glass, using them to create bespoke colors by fusing powders over sheet. Others have explored hybrid styles that play with layering and linework, incorporating the painterly techniques of artists like Narcissus Quagliata and Tim Carey into traditional approaches. Still others have simply made the most of Bullseye's expansive palette to bring their own dazzling styles to just the right shade of life—whether the charming three-dimensional plants of Hanna Hastings or the energized public murals of Tieton Mosaic (examples of both pictured). And we love it all. Whether our glass winds up in private homes or public billboards, window sills or cathedral towers, kitchen countertops or museum podiums, we're delighted to see all the magic being made out of it.

For stained glass tools and supplies, see: shop.bullseyeglass.com/tools-supplies/stained-glass

Above: Hanna Hastings, *3D Succulent*, 2022. Stained glass. Hastings brings nature and natural subjects into homes with her modern take on stained glass, inspired by a vast collection of houseplants. [@sandandfireworks](https://twitter.com/sandandfireworks)

Soft Ripples

Soft ripples add texture and highlights to stained glass and mosaic projects.

003026-0021

Woodland Brown Opal, Ivory, Black
003203-0021

Ring Mottles

Designed for stained glass and mosaics, ring mottles create the impression of dappled sunlight on petals, leaves, grass, or water. Non-fusible and not intended for kilnwork. The mottle patterning is heatwork sensitive: at full fuse temperatures, it will almost completely disappear.

Billets

Bullseye Compatible glass for casting.
Easy to ship, easy to use. V

Why choose Bullseye for casting? Bullseye billets are an excellent alternative to lead crystal. Our billets are safer, more economical, and significantly lighter—full lead crystal can weigh as much as 45% more. For more uniform color, use billets from the same production date. Our billets are also compatible with our complete line of sheet glass, frit, and powder.

Billets are approximately 5" x 10" x 0.75" (13 x 25 x 2 cm) and weigh approximately 3.4 lb (1.54 kg).

Selections show single, double, and triple thickness.

ANTHONY AMOAKO-ATTAH

I manipulate glass to look like woven fabric by screen printing and kilnforming with glass powders. My work explores themes related to the effects of migration, dislocation, and personal identity using traditional Kente designs and Adinkra symbols from Ghana.

—Anthony Amoako-Attah

Above: Anthony Amoako-Attah, *Take me home III*, 2023. Screen printed and kilnformed glass. 13.5" x 11" x 6" (34.5 x 28.5 x 14.6 cm). [instagram.com/kente_glass](https://www.instagram.com/kente_glass)

Stringer

Threads of glass pulled from re-melted Bullseye Compatible sheet. Available in 2 mm, 1 mm, and Fine Line (0.5 mm). For kilnforming and torchworking. 

Stringer are approximately 17.75" (451 mm) long, packed in clear plastic tubes 18" (457 mm) long and 0.75" (19 mm) in diameter.

Tubes are packaged by volume. A tube of 0.5 mm stringer contains approximately 275 pieces. A tube of 1 mm stringer contains approximately 123 pieces. A tube of 2 mm stringer contains approximately 50 pieces.

To reduce unit prices, tubes of gold-bearing glasses contain fewer stringer and are marked here with an asterisk *.

Rods

For torch or kiln, drawn from Bullseye Compatible glass. 

Bullseye rods are graded as either F (recommended for both kilnwork and torchwork) or T (recommended for torchwork only). Since all Bullseye rods are recommended for torchwork, the F and T grades are relevant only to kilnworkers. On these pages, T grade rods are marked with an asterisk (*). Unmarked rods are F grade.

Rods may be purchased as singles, by the pound, or in five pound quantities. (Approximately eighteen to twenty rods per pound.)

See *Hot Rods Starter Pack* on page 38.

Glass Packs

Maximum variety at minimal expense.
For outfitting a class or expanding your own palette.

Class Pack

A colorful assortment of Bullseye Compatible transparent, opal, irid, and clear glasses, individually marked for easy reference. May include some fusible Curious styles.

008359 Approximately 45 pieces of 10" x 10" (25 x 25 cm); or 38 pieces measuring 5" x 10" (13 x 25 cm) plus 25 pieces of 10" x 10" (25 x 25 cm). About 45 lb (20.4 kg)/30 sq ft (2.78 m²) of glass. **V**

Tekta Pack

A selection of 10" x 10" (25 x 25 cm) pieces of Tekta Clear in a variety of thicknesses: 30 pieces of 3 mm, 8 pieces of 4 mm, and 4 pieces of 6 mm. Trimmed on all sides, uniform and lead free.

008356 About 45 lb (20.4 kg)/30 sq ft (2.78 m²) of glass. **V**

Hot Rods Starter Pack

Great for teachers. A 5-pound assortment of opalescent and transparent rods in 17" (432 mm) lengths, and two dichroic SizzleStix in 3 mm and 6 mm widths and 15–16" lengths (381–406 mm). Rods are not labeled with style numbers.

008507 **V**

Clear Squares

Stack these handy pre-cut squares of 6 mm Tekta Clear on patterned or colored sheet glass and let them flow to create beautiful round cabochons. (See *Quick Tip: Circles from Squares* at bullseyeglass.com.) Also great for creating lens effects on sheet glass projects.

008777 Container holds approximately 40 pieces. Each square is 0.75" (1.9 cm). 0.46 lb (0.21 kg)

Disco Pack

Pre-cut circles of Bullseye Compatible Clear 3 mm sheets. Reduce preparation time for plate making. Includes a handout with helpful tips and firing schedules.

0083657.5" (191 mm) diameter, 30 discs **V**

0083669" (229 mm) diameter, 30 discs **V**

00836812" (305 mm) diameter, 20 discs **V**

Painting with Glass Pack

Eight 5 oz (14 g) jars of colored powders; one 1 lb (0.45 kg) jar of black powder; three jars of clear frit in Fine, Medium, and Coarse grains; and an assortment of colored stringer, four stencils, two powder sifters, a frit sifter, sgraffito tool, GlasTac Gel, and TipSheet 4: *Designing Your Own Art Glass*. (Sheet glass sold separately.)

008599 **V**

Studio Fuser Pack

A sampler of time-tested favorites. Approximately 20 colors of 3 mm and 2 mm fusible sheet glass (9 sq ft/0.84 m²), 10 tubes of frit, 5 bags of confetti, and 4 tubes of assorted stringer. Ideal for experimentation or jewelry projects. May include some fusible Curious styles.

008315 **V**

Sample Sets

When you need to see our glass in your own light. Selected for visual reference. Samples are not graded Bullseye Compatible.

While Bullseye is known for consistent color, the glass we produce is handmade. Slight variations from run to run are normal and expected. Samples are selected to represent our middle range of surface color, texture, and transmitted light. Glass you order based on these samples may vary slightly. For glass styles that change appearance with heatwork, we choose samples as close as possible to the color achieved after a full fuse. Fired color may vary depending on the firing cycles and kiln you use. This is especially true for “striking” glasses.

Billet Sample Set

Over 35 cut billet rectangles show Bullseye’s thirty tinted colors for casting, plus standard Clear, lead-free Crystal Clear, and opalescent styles Black and White. To predict color, view the sample through the side with the dimension that most closely matches the thickness of your planned project.

0081031.5" x 2.5" x 0.75" (38 x 64 x 19 mm)

Master Kilnforming Sample Set

Includes most standard colors that Bullseye makes. Over 435 samples—a range unsurpassed in the market. **Note:** Thin Iridescents, Ripples, Ring Mottles, and Cascade styles are not included.

00866213.25" x 19" x 18" (33.7 x 48.3 x 45.7 cm)

Individual Sheet Glass Samples

Order up to two samples in one style of sheet glass. Individual sheet glass samples measure 2" x 2" (51 x 51 mm).

Note: Each sample is engraved with its corresponding Bullseye style code for quick identification. These are not intended for kilnforming and may not be Bullseye Compatible. Visit shop.bullseyeglass.com for more information.

Modular Kilnforming Sheet Glass Sample Sets

Our modular kilnforming sample sets are designed to provide small groups of samples that meet users’ specific needs, at lower prices than are possible with our Master Kilnforming Sample Set. Individual sheet glass samples measure 2" x 2" (51 x 51 mm).

Kilnwork

Painting with Glass Tool Kit
The tools you need to design your own art glass: four stencils, three sifters, graining comb, and GlasTac Gel. Stencils may vary from photo.

008362

Bullseye GlasTac
Lightly tacks glass pieces in place prior to firing. Slow-drying and pliable, it allows readjustments as you work. Organic colorant lets you see where you've put it on clear glass, but it burns out in the kiln. Use sparingly. Water soluble.

008234.....4 fl oz (0.12 L) applicator bottle

008232.....32 fl oz (0.95 L) bottle

Bullseye GlasTac Gel
This thicker version of our regular GlasTac has a "tackier" feel but still burns out cleanly. Tacks sheet to sheet so you can move projects sooner. Great for children's projects. Use sparingly. Water soluble.

008268.....4 fl oz (0.12 L) applicator bottle

008269.....32 fl oz (0.95 L) bottle

Bullseye Straightedge
A dependable guide for making straight scores. The 0.25" (6 mm) thickness fits nicely with hand-held glass cutters. Made of lightweight and durable clear acrylic with a non-skid backing. Available in three lengths.

007269.....2.5" x 11" (6.4 x 28 cm)

007270.....2.5" x 22" (6.4 x 56 cm)

007271.....2.5" x 36" (6.4 x 91 cm)

Color Line Paints
From Creative Glass—these ready-to-use enamel paints come in a range of intense colors for painting, airbrushing, and more. Squeeze bottles can be used as lining pens or combined with the Tip Set for finer lines. Lead-free, and mixable to obtain additional shades. More than 25 individual colors and additional accessories are available at shop.bullseyeglass.com

Color Line Basic Set
Contains 18 2.2 fl oz (62 g) colors, a tip set (3 tips), and an empty bottle for mixing.
8470

Metal Foil
Add decorative elements to your fused works.

Gold
94.43% gold, 22.65 karat, 3.05 microns thick.
007218.....8" x 8" (20 x 20 cm)

Silver
98% silver, 3.5 microns thick, 9.5" x 9.5" (24 x 24 cm).
007217.....One sheet

007267.....3-pack
007277.....10-pack
007287.....100-pack

Copper
100% Copper, 25.4 microns thick.
007508.....Increments of 1 sq foot (0.09 m²)
008251.....Boxed roll 1' x 64' (0.3 x 19.5 m)

Sepp Copper Leaf Booklet
Add decorative elements to your fused works. Sepp Copper Leaf, 100% copper, 1.0 micron thick.
007511.....25 sheets, 5.5" x 5.5" (14 x 14 cm) each

Color Line Silk Screen Pastes
These lead-free pastes are ideal for screen printing on sheet glass. Add high-pigmentation design elements and imagery with no powdered enamels to mix. Pastes come ready to print.

Kilncasting

Accu-Cast Alginate 880 Blue

A flexible mold compound used to make molds for casting multiple copies of an original object or model. Mix with water to a creamy consistency. Sets in 5–10 minutes to become a firm but flexible mold. Can yield excellent detail. Molds can be kept several days in a sealed, airtight container. Because it sets quickly, this product is ideal for demonstrations and workshops.

0087121.5 lb (0.68 kg)

00871312.5 lb (5.7kg)

Bullseye Investment (Plaster-Silica)

A simple mixture of #1 Casting Plaster and silica flour, which releases easily from Bullseye glass.

0082445 lb (2.27 kg)

00824540 lb (18.14 kg)

Grog

A fired ceramic mixture. Added to Bullseye Investment, grog strengthens the outer layer or face coat) of a hand-built refractory mold.

00877010 lb (4.54 kg)

Above: Weston Lambert, *Emerald Ghost*, 2015. Kiln cast glass and jade. 16" × 9" × 3" (41 × 23 × 8 cm). Engraved, enameled, kiln-cast, cold-fused, carved, and polished. westonlambert.com

Molds

From Creative Ceramics in Europe, the finest commercial slumping molds on the market. Slipcast from a specially formulated clay body, these molds have an exceptionally smooth surface, accept primer uniformly, and do not crack under repeated use if handled properly. **V**

Note: The measurements given here are for the approximate outer dimensions of the mold. This is to help you determine whether a given mold will fit in your kiln. Since they are handmade, individual molds will vary in size. **Never cut glass to fit until you have measured your mold.** See *Suggested Slumping Schedules* at bullseyeglass.com. Includes schedules for more than 100 molds.

Kiln Supplies

To learn how to create multi-layered imagery in thick kilnformed blocks, see *TipSheet 3: Working Deep*.

Kiln Dams & Bricks

Mullite clay dams and hard brick bracers make containing thicker fused slabs a breeze. Our mullite dams are straight and true with crisp edges that make excellent contact with kiln shelves.

Three sizes of bricks and two sizes of dams. Combine and conquer. Tolerance on brick dimensions is 1/8" (3.18 mm).

- 008882.....Dams, 10" x 1.5" x 0.625" (25.4 x 3.8 x 1.6 cm) ✓
- 008893.....Dams, 20" x 1.5" x 0.625" (51 x 3.8 x 1.6 cm) ✓
- 008896.....Bricks, 9" x 2.25" x 2.5" (22.9 x 5.7 x 6.4 cm) ✓
- 008798.....Bricks, 9" x 4.5" x 2.5" (22.9 x 11.4 x 6.4 cm) ✓
- 008897.....Bricks, 4.5" x 2.25" x 2.5" (11.4 x 5.7 x 6.4 cm) ✓
- 008898.....Bricks, 4.5" x 1.125" x 2.5" (11.4 x 2.9 x 6.4 cm) ✓

Kiln Shelves

We went all the way to Europe to find absolutely flat shelves for our kilns. Composite cordierite and mullite.

- 008846.....14" x 14" x 0.625" (35.6 x 35.6 x 1.6 cm)
- 008819.....21.625" x 21.625" x 0.625" (55 x 55 x 1.6 cm)
- 008797.....24.5" x 24.5" x 0.75" (62.2 x 62.2 x 1.9 cm)

Check out our *Quick Tip: Kilncast and Slumped Bowl* for a great project idea employing this mold.

Bullseye Circle Dam

Made of vermiculite. Pre-fire and line with fiber paper before using with glass.

- 008768.....7" (17.7 cm) square
5.25" (13.3 cm) round opening
- 008848.....10" (25.4 cm) square
8" (20 cm) round opening

Bullseye Shelf Primer

Bullseye's popular pink formula. Each batch is kiln-tested to ensure consistency from run to run. Illustrated instructions discuss application, drying, mixing, precautions, and storage. One 5 lb bucket will coat about 150 shelves each measuring 20" sq (129 cm²).

- 008220.....5 lb (2.27 kg) ✓
- 008222.....40 lb (18.14 kg) ✓

Bullseye Vermiculite Board

A high-density vermiculite board that can withstand temperatures up to 2012 °F (1100 °C). This board is stronger than most fiberboard and can be cut and tooled just like wood. Not recommended for use as a kiln shelf. While it is certified asbestos-free, always use a NIOSH-approved respirator when cutting or creating dust. Before using with glass, prefire to 1580 °F (860 °C) for 30 minutes and crash cool.

- 008240.....1" x 24" x 36" (2.5 x 61 x 91.4 cm)
19 lb (8.6 kg)
- 008743.....1" x 17" x 20" (2.5 x 43 x 50.8 cm)
7.5 lb (3.4 kg)

Triangular Kiln Posts

The less surface area of post in contact with your shelf, the more uniform the shelf temperature. That's why we like these triangular posts. Stable enough to stack.

- 008888.....1" (2.5 cm)
- 008889.....2" (5.1 cm)
- 008980.....6" (15.2 cm)

008247

008249

Bullseye Vermiculite Boxes

Includes pre-cut and -drilled components and screws for making a vermiculite box. Assembly required. Pre-fire and line with fiber paper before using with glass. Note: Fiber paper not included. Measurements indicate external dimensions.

- 008247.....14" x 10" x 2.5" (35.5 x 25.4 x 6.4 cm)
- 008249.....10" x 10" x 4" (25.4 x 25.4 x 10.2 cm)

For more information about vermiculite products, including pre-firing instructions, see *Tips for Using Vermiculite Board* at bullseyeglass.com

Bullseye Ramp, Rigidized Fiberboard

Approximately 7.75" (19.7 cm) wide. Coat with shelf primer before firing. Designed for use with Bullseye Vermiculite Boxes (008247 & 008249).
008847

Fiber Paper

A kiln studio standard. As a shelf separator, it helps prevent bubbles between the shelf and the glass. As a perimeter dam, it insulates against thermal shock and improves annealing. Cut and construct with it for bas relief design. We use and handle only quality Lytherm paper because we like its tight weave and durability.

Sheet

007037 1/16" thick, 12" x 24" (1.5 mm, 30.5 x 61 cm)

007036 1/8" thick, 12" x 24" (3.2 mm, 30.5 x 61 cm)

007038 1/4" thick, 12" x 24" (6.4 mm, 30.5 x 61 cm)

Roll

007018 1/16" thick, 2' x 100' (1.5 mm, 0.61 m x 30.5 m)

007017 1/8" thick, 2' x 100' (3.2 mm, 0.61 m x 30.5 m)

007015 1/4" thick, 2' x 50' (6.4 mm, 0.61 m x 15.25 m)

Bullseye ThinFire Shelf Paper

For the smoothest finish on the bottom of your kiln-fired projects. Quicker and easier than frequent re-priming. Bullseye logo printed on the back side. Instructions included. Each piece good for one firing only.

Sheet

007090 5 sheets, 20.5" x 20.5" (52 x 52 cm)

008210 100 sheets, 20.5" x 20.5" (52 x 52 cm) 

Roll

008211 Roll, 250' x 41" (76.2 x 1.04 m) 

008710 Narrow Roll, 65' x 20.5" (19.8 x 0.52 m) 

008711 Short Wide Roll, 32.75' x 41" (9.98 x 1.04 m) 

Coldwork & Finishing

Loose Grit

Silicon carbide, pumice, and cerium oxide grit in an assortment of grain sizes for simple and effective grinding and polishing by hand.

007241 Silicon Carbide, 80 Grit, 1 lb (0.45 kg)

007248 Silicon Carbide, 120 Grit, 1 lb (0.45 kg)

007242 Silicon Carbide, 220 Grit, 1 lb (0.45 kg)

007243 Silicon Carbide, 400 Grit, 1 lb (0.45 kg)

007244 Silicon Carbide, 800 Grit, 14 oz (0.40 kg)

007246 Pumice, 0 - 1/2, 14 oz (0.40 kg)

007247 Pumice, FFF, 14 oz (0.40 kg)

007245 Cerium Oxide, 5 oz (0.14 kg)

Note: learn how to set up a loose grit grinding station and achieve different finishes in our free video lesson *Coldworking with Loose Grit* at [videos.bullseyeglass.com](https://www.bullseyeglass.com/videos)

The Grinder

A state-of-the-art grinder that stylishly combines power, durability, safety, versatility, and precision. It includes vibration dampening technology, a generous 16" x 12" (40.6 x 30.5 cm) work surface, an LED lumishield, a splash curtain, a removable water tray, universal compatibility for outlets, different-sized bits, and much more. Every feature anticipates a creative need and contributes to high performance and ease-of-use. Designed, engineered, and assembled in the USA.

007280

The full range of our coldworking & finishing equipment, print supplies and cutting tools are available online at shop.bullseyeglass.com

Bullseye Gear

Bullseye Kiln-Glass Color Wheel

The Bullseye Color Wheel is our newest, must-have color-planning tool. One side strategically arranges (almost) every opalescent Bullseye sheet glass color. The other does the same for (almost) all the transparent colors. Use it for visualization, for inspiration, and for picture-perfect realization of any project's palette. 9.25" (23.5 cm) diameter. 2-sided. **008786**

Bullseye Glass Mugs

Stackable and stylish, our 14 oz ceramic Color Mugs will impress friends and beverages alike. **007146** Mint Opal, Deep Forest Green Streaky
007147 Cranberry Pink, White Streaky
007148 Copper Blue and White Streaky
007149 Cranberry Pink, Gold Purple, White Streaky

Men's Bullseye Heritage T-shirt

A replica of the first-ever Bullseye t-shirt, designed by the company founders to celebrate surviving their first year in business. Short sleeves, classic men's t-shirt style. 100% cotton. Navy blue. Specify S, M, L, XL, XXL.

008853

Women's Bullseye Heritage T-shirt

Shorter waist and sleeves than on men's version. 100% cotton. Navy blue. Specify S, M, L, XL, XXL.

008854

Bullseye Black Denim Bib Apron

100% cotton denim bib apron. An adjustable neck with a metal grommet fits comfortably. Multiple pockets: one bib pocket with a pencil slot and one two-section center patch pocket. One size 33" x 29" (84 x 74 cm). **008787**

Learning to Work with Glass

Your success in the glass studio means everything to us! We take tremendous pride in our glass, our community of makers, and our commitment to equip and educate anyone who is interested in glass in the most affordable, convenient, and highly effective ways. Choose learning tools that are a good fit for your own needs.

Live/Online Classes

Learn from anywhere! Our live online classes are designed to provide a wide range of projects and techniques to kilnformers of all skill levels from all over the world. With the majority of classes, you'll learn through long-term access to an online instructional video, a generously detailed Class Guide, and live interactive sessions led by either a professional artist or Bullseye's Research and Education staff—and often both. Explore the latest educational opportunities at classes.bullseyeglass.com

eBooks

Download technical expertise at your convenience. Bullseye Glass offers a variety of eBooks by expert instructors and artists including Bob Leatherbarrow, Frank van den Ham, Judith Finn Conway & Kevin O'Toole, Kim Brill, Lois Manno, and Steven Richard. To see over 25 titles,

visit classes.bullseyeglass.com

Bullseye Videos

Watching is better than reading for some learners. Deepen your knowledge of kiln-glass. Be inspired. All online. For access to over 100 how-to lessons designed by Bullseye's Research and Education staff, join our

annual subscription program for \$45 at videos.bullseyeglass.com

Free Articles

We offer over 100 articles at no charge, free for you to download to get your questions answered or find project ideas to jumpstart your creativity. Download TipSheets, TechNotes, QuickTips, and

product use information at bullseyeglass.com/index-of-articles/

TechBook

For our free articles (see left) in handy book form, purchase the Bullseye Glass TechBook. Containing most of the articles from our library of online resources, this single volume provides a virtual undergraduate education in kilnforming. Soft cover, over 200 pages, in color. **008780**

What to Expect from Bullseye Glass

Color Variation

While Bullseye strives for consistent colors, our glass is a handmade product and colors may vary between production runs (and from images in this resource). Some colors may change upon repeated firing or with extensive heatwork. We recommend that you test samples of glass using the same firing cycles and processes to be used in finished pieces. When close color matches are needed, we recommend testing new dates first to ensure the range of color between batches will meet the needs of your project. Bullseye glasses are formulated for fired color. Unfired glass color may vary.

More questions? See *About Our Glass* for working notes and performance characteristics of specific glasses. See also *TechNotes 3: Compatibility of Glasses*.

Colors That Strike

Bullseye produces many glasses that appear pale or even colorless in their cold form but “strike” or mature to a target color when fired to the right temperature. These styles are marked with a .

- **Kilnformers:** When choosing a style, focus on the fired sheet color. Like ceramic glazes, the color will emerge after sufficient heatwork.
- **Stained glass and mosaic makers:** Be aware of strikers. Use only if you’re willing to pre-fire the glass before use, or select it in person. The unfired sheet colors for strikers vary widely.

Examples of Strikers at Various Process Temperatures

Key illustrations indicate which styles differ from color to struck form. Keep in mind that struck color may vary depending on temperature, atmosphere, and amount of heatwork. (See chart at right.) For example, failing to hold Ruby Red Tint (001824-0030-F) for an adequate time during the pre-rapid heat stage of a firing cycle can prevent the glass from striking correctly. This results in a blue-brown cast (or sapphirine effect) instead of a true ruby red color. See our *QuickTip: Gold-bearing Pink Tints* for more information.

Compatibility

Bullseye glasses are well known for reliable compatibility. But it’s important to understand the conditions of our factory testing, especially if you intend to fire glass under unusual conditions.

At Bullseye, we test glasses known to be fairly stable by firing them to a temperature of 1500 °F (815 °C) and then holding for 15 minutes before annealing. Once cooled, these tests are viewed for stress through a polarized light filter and graded accordingly. We fire glasses known to be less stable three times to make sure they’ll perform well under multiple firing conditions, such as those used to fuse and slump a plate.

If you are using a heat process that involves an extra-high temperature or an unusually long firing time, we recommend that you test the glass yourself, under conditions specific to your project. For example, if you want to include flameworked elements in a kilnformed project, remember that flamework takes glass to temperatures exceeding the compatibility tests we do at the factory and that some glasses are more sensitive to extensive work in the flame. Therefore, it will be important not to overwork your glass during flameworking and to test the flameworked components for

Approximate color before firing

Color after a full fuse firing. A solid sample indicates no change from unfired to fired. Each sample is 8” (20 cm) wide.

At left: an example of a “key illustration” that indicates cold, unfired glass adjacent to a sample of a full fused piece of glass.

Below: Struck color based on heatwork. In addition, see what happens to Ring Mottles, non-fusible glass, when exposed to heatwork

At Right: “Champagne” bubbles are a normal feature of kiln-glass. See *TechNotes 5: Volume & Bubble Control* at bullseyeglass.com

compatibility using the full range of kilnforming processes planned for the finished project.

Also note: some processes that may not appear to exceed the parameters of the compatibility test actually do exceed it. For example, holding some glasses for long times at temperatures around 1400 °F (760 °C), which is in the devitrification range, can cause the glass to change dramatically.

Many artists (the late Klaus Moje, for example) are able to push Bullseye glass to high temperatures for long times with exceptionally good results, but their success is ensured by testing. No manufacturer can guarantee glass to perform as expected under all imaginable working conditions. Testing is a wise practice with whatever glass you use.

Get a Reaction

When some styles of Bullseye glass are combined in the kiln, their chemistries have the potential to react, producing special effects that range from subtle to dramatic.

Potentially Reactive Combinations		
Copper	+	Sulfur/Selenium
Lead	+	Sulfur/Selenium
Reactive	+	Copper

Reactive Styles	
These glasses do not contain sulfur, copper, or lead, but may react with copper-bearing glasses, copper leaf, and silver.	
000009	Reactive Cloud Opal
001009	Reactive Ice Clear
001019	Red Reactive Clear

Alchemy Series	
Reacts with silver.	
001015	Clear, Silver to Gold
001016	Clear, Silver to Bronze

To learn more about reactions, see the article *Get a Reaction: Bullseye Reactive Glasses* at bullseyeglass.com, or watch our online video lesson *Color Reactions and Special Effects*, at videos.bullseyeglass.com (Subscription required.)

For styles not listed on this page, visit *About Our Glass* at bullseyeglass.com

Layup for this tile: 3 mm Robin's Egg Blue Opalescent (copper-bearing) on a 3 mm Clear base, with coarse French Vanilla Opalescent (sulfur/selenium-bearing) frit. Process temperature: 1490 °F (810 °C).

Lead-Bearing Styles	
000301	Pink Opal
000303	Dusty Lilac Opal
000304	Lavender Opal
000305	Salmon Pink Opal
000313	Dense White Opal
000334	Gold Purple Opal
001205	Light Coral
001215	Light Pink
001234	Violet
001305	Sunset Coral
001311	Cranberry Pink
001332	Fuchsia
001334	Gold Purple
001823	Burnt Scarlet Tint
001824	Ruby Red Tint
001831	Ruby Pink Tint

Copper-Bearing Styles	
000104	Glacier Blue Opal
000116	Turquoise Blue Opal
000144	Teal Green Opal
000145	Jade Green Opal
000146	Steel Blue Opal
000161	Robin's Egg Blue Opal
000164	Egyptian Blue Opal
000216	Light Cyan Opal
000345	Steel Jade Opal
001116	Turquoise Blue
001145	Kelly Green
001164	Caribbean Blue
001176	Peacock Blue
001217	Leaf Green
001226	Lily Pad Green
001246	Copper Blue
001408	Light Aquamarine
001416	Light Turquoise Blue
001417	Emerald Green
001464	True Blue
001808	Aqua Blue Tint
001845	Ming Green Tint
001816	Turquoise Blue Tint
001917	Cilantro Green Tint

Sulfur/Selenium-Bearing Styles	
These glasses will also react with silver. Many glasses can be stained if fired with silver.	
000024	Tomato Red Opal
000025	Tangerine Orange Opal
000120	Canary Yellow Opal
000124	Red Opal
000125	Orange Opal
000126	Spring Green Opal
000137	French Vanilla Opal
000203	Woodland Brown Opal
000220	Sunflower Yellow Opal
000221	Citronelle Opal
000222	Avocado Green Opal
000224	Deep Red Opal
000225	Pimento Red Opal
000227	Golden Green Opal
000309	Cinnabar Opal
000310	Umber Opal
000320	Marigold Yellow Opal
000321	Pumpkin Orange Opal
000329	Burnt Orange Opal
000337	Butterscotch Opal
001025	Light Orange
001119	Sienna
001120	Yellow
001122	Red
001125	Orange
001126	Chartreuse
001137	Medium Amber
001138	Dark Amber
001207	Fern Green
001241	Pine Green
001320	Marigold Yellow
001321	Carnelian
001322	Garnet Red
001422	Lemon Lime Green
001437	Light Amber
001857	Red Amber Tint

Bullseye Coding System

Each Bullseye glass product is coded according to this system.

000100 – 0008 – F – P005

Item code for Black, Powder, Fusible, 5 lb/2.3 kg jar.

a six-digit style code

a four-digit suffix

a grade code

and a size code

6-Digit Style Code

Indicates the base glass color.

Stringer

- 0507 Stringer, 0.5 mm
- 0107 Stringer, 1 mm
- 0272 Stringer, 2 mm

Grade Codes

Glass is assigned one of six grades.

F: Often called “Fusible,” a glass that has passed factory testing for color and compatibility in kilnwork. Also called “Tested Compatible” or “Bullseye Compatible.” Recommended for kilnwork, framework, stained glass, or mosaic. (Stained glass and mosaic makers, see note on page 50 of the catalog regarding strikers.)

P: First-quality non-fusible glasses are called “Standard Production.” Not recommended for kilnwork but good for stained glass or mosaic.

B: Fusible-curious glasses. Compatible, but fired color or appearance may not fall within the accepted color range or may have minor flaws. Sometimes called “Furious.” Discounted. Recommended for kilnwork, framework, stained glass, or mosaic. (Stained glass and mosaic makers, see note on page 50 regarding strikers.)

C: Non-fusible, non-standard glasses are graded and marked “Curious.” These may not fall within the accepted color range or may have minor flaws. Discounted. Not recommended for kilnwork but good for stained glass or mosaic.

F Rod: Recommended for both kilnwork and torchwork.

T Rod: Recommended for torchwork only.

Size Codes

All metric conversions are approximate. All color sheets have rolled edges. Therefore, some sheet glass dimensions are approximate due to the rolled edges of this handcrafted product.

Sheet Glass (approximate)
 -1010 10” x 10” (25.4 x 25.4 cm)
 -full 35” x 20” (88.9 x 50.8 cm)
 -half 17” x 20” (43.2 x 50.8 cm)

Confetti
 -0204 single color 4 oz (113 g) jar
 -p001 single color 1 lb (454 g) jar
 -0208 minimix 8 oz (227 g) jar
 -p002 minimix 2 lb (907 g) jar

Cullet
 -p050 50 lb (23 kg) box

Frit
 -0205 5 oz (142 g) jar
 -p001 1 lb (454 g) jar
 -p005 5 lb (2.27 kg) jar
 -p040 40 lb (18 kg) bucket

Ribbons
 -tube single tube

Rods
 -each single rod
 -p001 1 lb (454 g)
 -p005 5 lb (2.3 kg)

Stringer
 -tube single tube

Tekta
 -1010 10” x 10” (25.4 x 25.4 cm)
 -1720 17” x 20” (43.2 x 50.8 cm)
 -2424 24” x 24” (61 x 61 cm)
 -2448 24” x 48” (61 x 122 cm)
 -2472 24” x 72” (61 x 183 cm)
 -4040 40” x 40” (102 x 102 cm)
 -4080 40” x 80” (102 x 203 cm)

Product Specifications

SHEET GLASS		
SUFFIX	THICKNESS	MAXIMUM DIMENSIONS ARE APPROXIMATE
thin (-005x)	2 mm (3/32”)	20” x 17” (51 x 43 cm)

TO LOCATE A BULLSEYE DEALER

Search under Dealers at bullseyeglass.com

Prices

Bullseye offers a generous volume discount structure—see below. To learn about wholesale pricing, please call or email our Sales Department. Prices are subject to change without notice.

Volume Discount

We offer discounts online, via mail order, and through our Bullseye Resource Centers. Discounted items include all sheet glass, billet, frit, ribbon, rod, stringer, confetti, molds, and items marked with the  symbol.

VOLUME DISCOUNTS

Order Amount	Discount
\$200–\$499	10%
\$500–\$799	20%
\$800–\$1,099	30%
\$1,100–\$1,599	40%
\$1,600 +	50%

Notes and Restrictions: Prices listed are retail. Sheet glass is sold by the piece. Some listed sheet glass dimensions are approximate, due to the handcrafted nature of the product. Discounts apply to single orders only, not a combination of orders. Your order can include any combination of items (glass, tools, etc.) to qualify for a greater discount, but the discount will only be applied to qualifying items.

Packing

We have boxes especially designed for shipping sheet glass in most Bullseye sizes.

- 10 x 105 = box can hold 1–40, 3 mm sheets
- Half sheets = box can hold eight, 3 mm sheets
- Full sheets = box can hold eight, 3 mm sheets

Large-quantity sheet glass orders are packed into sturdy wooden crates, then banded together or palletized for safe transport. For orders of more than 20 sheets, contact the Sales Department at sales@bullseyeglass.com or 503.232.8887

Shipping

Most parcel orders ship within two business days. We must have a street address for UPS delivery. Contact sales@bullseyeglass.com for freight options.

Returns

Contact us for authorization and instructions. A credit will be issued for merchandise returned in new condition within 30 days of purchase. Restocking fees may apply.

Gift Cards

Surprise your friends and family with one—or drop a hint and make it easy for them to get you a glassy gift!

Bullseye Gift Cards are sent to the Recipient Email within one business day. If you would like to deliver the gift at a later time, enter your own email and then forward it at your convenience.

Bullseye Gift Cards are redeemable for anything Bullseye sells: glass, supplies, books, tools, and classes.
