

Glass Casting Supervisor (Full-Time)

3722 SE 21st Portland, OR 97202

Bullseye is seeking a full-time day supervisor to lead a team of glass casters making hand cast sheet glass. That means you will help transfer molten glass from a furnace to a rolling mill, via a wheeled ladle, producing sheets your team will load into a giant cooling oven known as a Lehr. You will oversee a four-person team that makes large-scale glass sheets (Tekta) used in the art and architecture market.

If you are a safety-conscious, high-stamina team leader who feels inspired to contribute to one of Portland's original art-driven companies, please apply.

Job Requirements

Ideal candidate should have 1-3 years' experience in a production environment, 2 + years experience in supervision, and college degree preferred. Qualified candidates should possess good leadership, common sense, and effective communication skills.

Responsibilities:

- Lead and develop team members.
